Lugo awning light

ALL-IN-ONE COMPLETE PACKAGE

PROFESSIONAL AWNING LIGHT

Instantly create a warm and atmospheric ambience under your awning with the Lugo awning light. This complete set contains everything you need for a neat and simple installation: aluminium profiles, Neonflex lighting, mounting materials, cable grommets, silicone adhesive and a dimmer with remote control.

The aluminium profile easily mounts onto the existing awning section, after which the Neonflex lighting is firmly pressed into the profile. The modular set is up to 5 metres long and can easily be cut to size for a perfect fit on the awning.

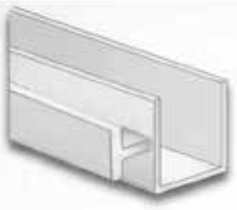

Everything you need is included in the box. Thanks to the complete package, ensuring a professional finish and optimum ease of use.

1

The Neonflex LED strip fits perfectly into the profile. The 5 m strip can be cut to size

2

5x 1 m aluminium U-profiles with a T-shape that slides easily into the awning rail.

3

Roof feed-through ensures a watertight passage for cables

4

RF dimmer for switching the LED strip on and off and adjusting the brightness

5

Wireless remote controls for switching the LED lighting on/off and dimming it

6

Two sets of screws for securing the profile end sections

7

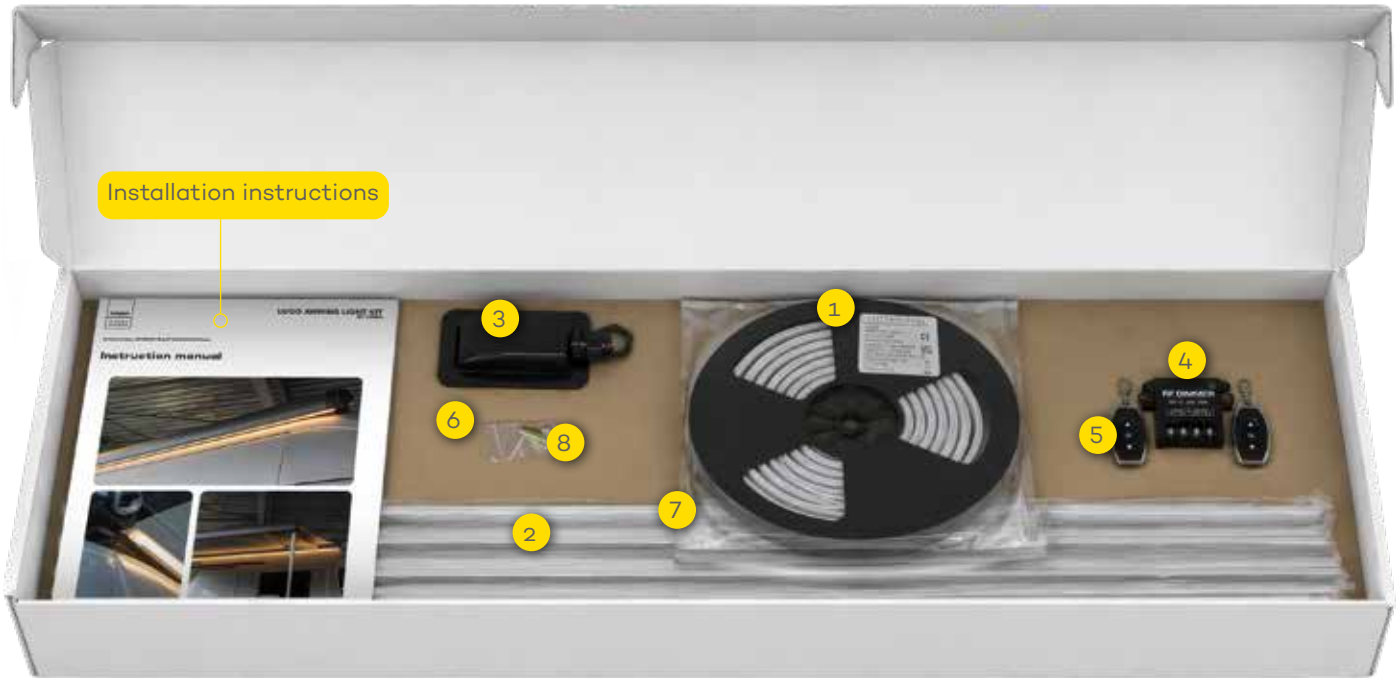

End cap for watertight sealing of the cut-to-length LED strip

8

Silicone adhesive for securing the end cap to the trimmed LED strip

We recommend installation by an authorised dealer or qualified technician.

WHY CHOOSE LUGO?

The warm white light colour of 3000K provides pleasant lighting during long summer evenings at the campsite or motorhome pitch. Thanks to the included remote controlled dimmer, the brightness can be adjusted effortlessly, from bright task lighting while cooking to soft ambient lighting for relaxing.

Furthermore, with an IP44 protection rating, the lighting is suitable for outdoor use and is splash-proof. Specially designed for fitting to Thule Omnistor 6200, 6300 and 9200 awnings. The system integrates seamlessly with your existing awning for a sleek and professional finish.

The benefits at a glance:

- Warm white light (3000K) for a cosy atmosphere
- Uniform light distribution with no visible LED dots
- The Neonflex LED strip is securely held in place by the aluminium U-profile
- Dimmable using the supplied dimmer with remote control
- Complete set including all mounting materials
- Quick and easy installation
- IP44-rated and suitable for outdoor use

Designed for:
Thule Omnistor 6200
Thule Omnistor 6300
Thule Omnistor 9200
